"No one knows Blocks and Pavers better"

ISLAND BLOCK & PAVING PRODUCT INFORMATION

The Architectural Building Block range includes Coloured blocks as well as the popular Exposed Aggregate block range.

Architectural Blocks are made to order and can be manufactured using sand aggregate or for no additional cost sustainable coloured recycled glass aggregates, blocks made with coloured glass aggregates are trademarked as "Blocks for the Future" and have achieved Greentag certification.

COLOURED BUILDING BLOCKS

Island Block & Paving produce a full range of coloured building blocks. These are made to order and available in a large variety of colours and textures including smooth, split and etched finishes. To ensure longevity of colour and appearance all coloured blocks are manufactured with Tech-Dry water repellent additive. Coloured building blocks from Island Block and Paving provide a low maintenance wall finish that allows designers the flexibility of incorporating various sizes, colours and finishes to complete the most impressive of contemporary designs, all at an affordable price.

islandblock.com.au/colouredblocks

EXPOSED AGGREGATE BLOCKS

Island Block and Paving offer a comprehensive range of exposed aggregate finished building blocks. Exposed aggregate blocks can be manufactured specifically to an architect's specification ie. block colour, type of aggregate and the degree of shot blasting can all be varied to suit an individual design.

Exposed aggregate blocks are used for many applications including up market residential homes, commercial buildings and feature walls.

ALSO AVAILABLE...

Blocks for the Future are a premium architectural block which is available in a variety of colours which are supplied in exposed aggregate, diamond brushed or standard finishes. Blocks for the Future are a highly sustainable product because they are manufactured with up to 40% recycled glass aggregates which provide a unique finish that glistens in the light. Designers can request free samples and specify their selected finish. After manufacture the blocks are treated to expose the recycled glass coloured aggregate on the surface.

Blocks for the Future are the only building blocks in Australia that have achieved Global Green Tag certification, the environmental benefits are enormous as natural resourced aggregates such as sand and metal dust, are replaced in manufacture by a potential landfill product. Due to the cementitious value of the finely crushed recycled glass, cement usage is reduced by 10% - therefore importantly reducing CO2 emissions whilst still achieving excellent product strength.

islandblock.com.au/blocksforthefuture

Bricks for the Future from Island Block & Paving offer a state of the art patented brick selection, nationally recognised for its unique surface textures, inspirational modern colours and Global Green Tag certification. Bricks for the Future are exclusively manufactured by award winning, Tasmanian owned company Island Block & Paving. The patented Bricks for the Future are the ideal brick choice and are available in two sophisticated styles - the "Premium Range" and the "Designer Range". They include subtle brick colours in either stunningly smooth or exposed aggregate surface textures. All bricks are made with six holes to assist bricklaying.

Premium Brick Range - Global Green tag certified, made with recycled coloured glass aggregates which provide a unique surface finish that glistens in the light.

Designer Brick Range - Contemporary colours and neutral blends, designer bricks are made with natural sand aggregates.

HERITAGE STONE

Heritage Stone reconstructed blocks recreate the look of yesteryear. Heritage Stone blocks have neat bevelled edges which give a stately appearance for homes of quality and distinction.

Old Sydney

HERITAGE STONE BLOCKS

Heritage Stone is an alternative to conventional brick. Heritage Stone reconstructed sandstone blocks provide the classical look of yesteryear. Heritage Stone is laid in exactly the same way as standard concrete building blocks and is far quicker to lay than conventional brick. On site handling is minimized as there are only 12.5 Heritage Stone blocks per square metre compared to 50 bricks. Heritage Stone is available in 3/4, 1/2 and 1/4 sizes, as well as with split or smooth quoins for corners. The availability of a huge range of manufactured accessory products equate to huge savings on labor as no expensive on site cutting is required.

islandblock.com.au/heritagestone

Coloured and/or blended blocks can vary due to the use of natural aggregates. Shot blasting or splitting the face of coloured blocks will also affect the colour. We welcome the opportunity to supply full sized samples of our current products.
