

DIY WALL BLOCKS

"No mortar, no fuss"

Do it yourself concrete blocks provide a lightweight, mortarless block, for unskilled labour to build their own concrete block walls. Each DIY wall block has patented connecting lugs which automatically connect to the adjoining blocks when laid. The 400mm L x 200mm W x 200mm H DIY wall blocks can incorporate C section fence posts, Colorbond panel fences and balustrades within the blocks, ensuring that all available space is utilized by not having to fix any boundary posts behind the wall. With recycled aggregates and Greentag certification, DIY blocks tick the boxes as an environmentally responsible DIY alternative to concrete block walls.

Lightweight Natural

- DO IT YOURSELF
- BUILD YOUR OWN WALLS
- SUSTAINABLE CONCRETE BLOCK OPTION
- SELF LOCATING, LIKE LEGO BLOCKS
- LIGHTWEIGHT
- SAVE TIME & \$\$\$

Design Registration: 2021 15060
